Adoption of industry's first breathable Teflon belt
(Patent acquired)

- The width of the new belt does not shrink unlike the existing felt belt.
- Stable for belt position control
- Low cost for replacement

Adopt stainless drum for Electric heater type

- The stainless drum is low dissipation compare with teflon drum
- High stability due to low heat dissipation

3 temperature controls (left, center, right)

- It can be adjusted left/right temperature control

Working Table is included for parts transfer

Adoption of air shaft

Stronger and more uniform tension can be applied than ever before.

LED signal

The status can be checked by LEDs.
